DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-17 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,710,092.

3. Although the conflicting claims are not identical, they are not patentably distinct from each other because Patent No. 6,710,092 claims the emulsion and the process of forming the emulsion, as claimed herein; however the patent fails to claim that the wall forming material is not urea formaldehyde. Nevertheless, the enabling disclosure makes known this limitation (col. 17, line 52 to col. 18, line 29). Therefore the invention defined in the claims herein would have been an obvious variation of the invention described in the claims of Patent No. 6,710,092. See MPEP §804.

Claim Objections

4. Applicant is requested to correct the numerous spelling errors present in the claims, specification and abstract.

Allowable Subject Matter

5. The claims would be allowable if a terminal disclaimer overcoming the obviousness-type double patenting rejection above is submitted.

6. Claims 1-12 and 17 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 13-16, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

7. Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 3/23/2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

8. The following is a statement of reasons for the indication of allowable subject matter: Applicants have successfully traversed the 102(b) rejection of the claims. Specifically, applicants have correctly argued that the emulsifiable adducts of the invention of Shen et al. do not constitute a surfactant layer around a droplet. Wherein the presence of a surfactant layer around the droplet is a required limitation in applicant's claims.
